Quiz 3

Roll number: BSSSE23058

Q1. Previously you implemented the array list and now write a function that Deletes data from a specific index. The index is provided by the user. The function must be generic and it can handle all cases.
`deleteAtIndex(int index);`

Example

Current array

0 15 20 6 10 0

After deletion at index 2

0 15 6 10 0
