
Week 1: Entrepreneurial Mindset

1. **b) Intrapreneur**
   - **Reason:** An intrapreneur is an employee who innovates *within* an existing organization.
2. **b) Emotional Pain Point**
   - **Reason:** It solves the *feeling* of shame or anxiety associated with stains, not just the physical stain itself.
3. **c) Identify a problem/opportunity**
   - **Reason:** This is the first step of the process. He noticed a problem (no electricians) before he even had an "idea" for a business.
4. **b) Emotional (Insecurity)**
   - **Reason:** As per the slides, dandruff is linked to self-presentation and insecurity.
5. **c) Branding**
   - **Reason:** The slide "Difference between Marketing, Advertisement and Branding" defines branding as creating an "emotional image" and "loyalty."
6. **a) Productivity Pain Point**
   - **Reason:** The app's core value is saving time and making work more efficient.

Week 2: Knowing Your Customers (STP & Differentiation)

7. **c) A mix of Geographic (urban), Demographic (high-income, 25-40), and Psychographic (value technology)**
   - **Reason:** It combines variables from all three bases of segmentation.
8. **b) Niche Marketing**
   - **Reason:** This strategy targets a small, specific, and well-defined segment.
9. **c) Positioning**
   - **Reason:** Positioning is the "clear, distinctive... place" the brand occupies in the consumer's mind.
10. **b) Service Differentiation**
    - **Reason:** The company is distinguishing itself based on its customer service, not its physical product.
11. **d) Differentiation**
    - **Reason:** This was the definition from the whiteboard note (Page 26, "Segmentation, Targeting.pdf"), defining a unique solution.
12. **a) Segmented (Differentiated) Marketing**
    - **Reason:** The company is offering different products and marketing for different

segments.

Week 3: The Big Idea (VPC & Strategy)

13. **b) Pain Relievers**
    - **Reason:** The goal of the VPC is "fit." Pain Relievers are designed to solve Customer Pains.
14. **c) Customer Job**
    - **Reason:** A "Customer Job" is the task, problem, or need the customer is trying to get done.
15. **d) Esteem Needs**
    - **Reason:** Luxury goods appeal to the desire for status, achievement, and respect from others.
16. **c) HOW does the customer value?**
    - **Reason:** The "third space" is the *package* or *form* in which Starbucks delivers its value (the "how").
17. **b) Adding sugar (e.g., Frappuccinos) and using Italian-sounding names for sizes.**
    - **Reason:** This is the core of "Strategic Inauthenticity"—making the "elite" product palatable for the masses.
18. **a) Useful**
    - **Reason:** The lecture "The Big Idea.pdf" (Page 4) lists the three attributes as New, Useful, and Feasible.

Week 4: Marketing Your Venture (Mix & Ocean)

19. **b) Price Skimming**
    - **Reason:** This is the definition of skimming: starting high to capture "early adopters" and then lowering the price.
20. **c) Psychological Pricing**
    - **Reason:** Using "Rs. 99" makes the product seem significantly cheaper than "Rs. 200," appealing to the customer's psychology.
21. **c) Augmented Product**
    - **Reason:** The "Augmented Product" (Page 3-4, "Lecture # 7-8.pdf") includes the non-physical, added-value parts like warranties and after-sale service.
22. **c) Trying to beat competitors in an existing, crowded market.**
    - **Reason:** This is the definition of a Red Ocean—a market full of competitors ("blood in the water").
23. **a) Value Innovation**

    - **Reason:** This is the "cornerstone" of Blue Ocean Strategy, defined as the simultaneous pursuit of differentiation AND low cost.
24. **a) Create a new value curve for a Blue Ocean.**
    - **Reason:** The ERRC grid is the framework used to decide what to change about an industry to create new value.
25. **b) Leveraged the external trend of digitalization.**
    - **Reason:** The "Six Paths Framework" table (Page 19, "Lecture # 7-8.pdf") explicitly states Zameen.com leveraged the "digitalization trend."

Week 5: Advertising Your Venture (Models)

26. **a) The use of any advertising model.**
    - **Reason:** The slide "Why Entrepreneurs Need Advertising Models" lists all these benefits (pitching, saving time/money, consistency).
27. **a) Attention**
    - **Reason:** A billboard's primary job is to be seen and grab awareness from a passing audience.
28. **b) Feel $\rightarrow$ Learn $\rightarrow$ Do (Affective)**
    - **Reason:** A Rolex is a High-Involvement/Feeling purchase (Quadrant 2). The ad must first build an emotional/ego connection ("Feel").
29. **c) Do $\rightarrow$ Learn $\rightarrow$ Feel (Habitual)**
    - **Reason:** Milk is a Low-Involvement/Thinking purchase (Quadrant 3). You buy it out of habit ("Do"), then confirm it's fine ("Learn"), and feel satisfied ("Feel").
30. **c) Direct-Response Advertising**
    - **Reason:** It demands an *immediate action* ("Call now!") from the viewer.
31. **b) Institutional Advertising**
    - **Reason:** It promotes the *organization* (UCP) as a whole, not a specific product.
32. **a) Perception (Hear) and Emotion (Feel)**
    - **Reason:** You *hear* the music (Perception) and it makes you *happy* (Emotion).
33. **b) Creation Stage**
    - **Reason:** This is the stage where the creative concept or "big idea" is developed.

Week 6: Social Media Marketing (Meta)

34. **c) The Ad Objective (e.g., "Conversions")**
    - **Reason:** The objective is the only setting at the top-level Campaign. Budget, Audience, and Creative are set at lower levels.
35. **b) Ad Set Level**

- **Reason:** The Ad Set level is where you define the Audience (targeting), Budget, and Placements.

36. **c) Traffic**
    - **Reason:** The "Consideration" phase objectives show that "Traffic" is the objective for getting website/link clicks.
37. **d) Audience Network**
    - **Reason:** The Audience Network is Meta's network of third-party apps and websites where your ads can be placed.
38. **b) The landing page is bad, or the offer is not compelling.**
    - **Reason:** High CTR means the ad is working. Low CVR means the *destination* (the landing page) is failing to convert the clicks.
39. **a) Vertical Scaling**
    - **Reason:** Vertical Scaling is defined as increasing the budget on an existing, winning ad set.
40. **a) Estimated Action Rates**
    - **Reason:** The formula from "11-12.pdf" (Page 31) is Total Value = [Advertiser Bid] x [Estimated Action Rates] + [Ad Quality].

Week 7: Branding Your Venture

41. **b) Branding**
    - **Reason:** The "Branding.pdf" (Page 2) defines branding as the "complete story and emotional connection," using Nike as the primary example.
42. **a) Brand Persona**
    - **Reason:** The "Brand Imagery Example.pdf" defines "Amara" as the brand's persona, giving it human-like personality traits.
43. **b) Brand Avatar**
    - **Reason:** A mascot (like "ChocoBuddy") is a visual character or *avatar* that represents the brand.
44. **b) Brand Storytelling**
    - **Reason:** The narrative built from the mission, values, and origin is the brand's story.
45. **b) Answering "What emotion or memory should my brand trigger?"**
    - **Reason:** "Branding.pdf" (Page 10) explicitly links color choice to answering this psychological question.

Week 8: Designing Your Venture's Supply Chain

46. **d) Advertising Model**

    - **Reason:** The "Devising Merchandise Plan" diagram (Page 2, "15-16.pdf") lists Innovativeness, Forecasts, Assortment, Brands, Timing, and Allocation.
47. **b) Direct-to-Store Model**
    - **Reason:** The lecture defines this as goods being "shipped directly from suppliers to individual stores."
48. **a) Channels**
    - **Reason:** The "Role of Channels" slide (Page 13) defines channels as the different ways a customer can buy (store, online, etc.).
49. **b) Innovativeness (What?)**
    - **Reason:** The "Flow of Merchandise Planning" (Page 15) lists the 3-step order as: 1. Innovativeness, 2. Forecasting, 3. Timing.
50. **c) Timing**
    - **Reason:** The quote "Great products fail if launched at the wrong time" (Page 15) directly points to the importance of the "Timing" step.
