

Class Activity: MVP Backlog Creation Workshop

Zunaira Abdul Aziz

BSSE23058

Part 1: Introduction and Setup

Project Idea: Personal Recipe Manager with AI Suggestions

Part 2: User Stories

1. As a cooking enthusiast, I want to create an account and save my favourite recipes so that I can securely store and quickly find them later.
2. As a cooking enthusiast, I want to search recipes by name or category so that I can explore meal ideas.
3. As a cooking enthusiast, I want to upload or type in my own recipes so that I can keep all my recipes in one place.
4. As a cooking enthusiast, I want to generate a shopping list from a recipe so that I don't forget ingredients when shopping.
5. As a cooking enthusiast, I want to enter the ingredients I have at home so that I can see recipes I can cook right away.
6. As a cooking enthusiast, I want AI-powered meal suggestions so that I can discover new food ideas.

Part 3: Acceptance Criteria

Story 1: Create account & save recipes

- Account is created when valid details are entered.
- Saved recipes appear in "Favourites."
- Saved recipes remain after logging out and back in.

Story 2: Search recipes

- Typing a keyword shows matching recipes.
- Choosing a category shows only recipes from that category.

Story 3: Upload own recipes

- Entering recipe details and saving adds it to collection.
- Uploaded recipes stay visible after reopening the app.

Story 4: Generate shopping list

- Tapping "Shopping List" shows all ingredients.

- Ingredients can be checked off as completed.

Story 5: Enter ingredients & get recipes

- Entering ingredients shows recipes that use them.
- If no recipe matches, app shows “No results.”

Story 6: AI-powered suggestions

- Suggestions match saved food preferences.
- Suggestions use ingredients entered by the user.

Part 4: Story Map

Account & Setup	Discover Recipes	Manage Recipes	Shopping Support	Smart Suggestions
Create account	Search by name	Upload recipes	Generate shopping list	Enter ingredients to get recipes
Save recipes	Search by category	Type receipes	Check off ingredients	AI-powered suggestions

Part 5: MoSCoW Prioritization

Must Have (Essential for MVP)

- Create an account & save recipes
- Search recipes by name or category
- Enter ingredients to get recipe suggestions

Should Have (Important but not critical)

- Generate a shopping list from a recipe

Could Have (Nice to include if time allows)

- Upload or type in own recipes
- AI-powered meal suggestions

Won't Have (This time)

- Advanced AI meal planning
- Social sharing of recipes
- Ratings & tags for recipe

Part 6: Final MVP Backlog

1. Create account & save recipes

- Account is created with valid details.
- Saved recipes appear in “Favourites.”
- Saved recipes remain after logout/login.

2. Search recipes by name or category

- Keyword search shows matching recipes.
- Category filter shows only that type of recipe.

3. Enter ingredients to get recipes

- Entered ingredients show recipes that match.
- If no recipe matches, app shows “No results.”
