

1. Why Entrepreneurs Need Advertising Models

Advertising models are not just theories; they are practical tools. According to the slides, you need them to:

- **Connect the Right Model with Your Brand:** Match your product and audience to the best communication approach.
 - **Pitch Your Brand Effectively:** Use a structured model to present your idea clearly and persuasively.
 - **Save Time and Money:** Focus your efforts only on what truly influences the customer.
 - **Ensure Message Consistency:** Keep your communication aligned across all platforms.
 - **Understand and Influence the Customer Journey:** Know where your customer is (awareness, interest, etc.) and tailor the message.
 - **Measure and Improve Performance:** Get a roadmap to assess what's working.
-

2. Difference: Marketing vs. Advertising (Recap)

This is a fundamental distinction that often appears on exams.

- **Marketing:** The overall **strategy** of identifying customer pain points, creating a valuable solution (product, price, place), and building a relationship with the customer.
 - **Advertising:** A **tactic** or *component* of marketing. It is the *promotional* part—the process of communicating your solution to the target audience to persuade them.
-

3. Key Advertising Models

This is the most critical part of the lecture. You must know what each model is, what its components are, and how it works.

A) The AIDA Model (Hierarchy of Effects)

This model describes a **sequential process** the customer goes through.

1. **A = Attention (Awareness):** The first step. The ad must grab the customer's attention and make them aware of the brand or product.
2. **I = Interest:** Once you have their attention, you must generate interest in the product's *benefits*.
3. **D = Desire:** Move the customer from "I like it" to "I want it" by creating an **emotional connection**.
4. **A = Action:** The final step. Prompt the customer to *do* something (buy, call, click, etc.).

B) The FCB Model (Foote, Cone & Belding)

This model classifies products into a 4-quadrant grid based on **Involvement (High/Low)** and **Thinking/Feeling**. The *strategy* changes for each quadrant.

Quadrant	Type (Involvement/Processing)	Product Example	Ad Strategy (Sequence)
1. Informative	High Involvement / Thinking	Car, House, PC	Learn → Feel → Do (Give lots of rational info)
2. Affective	High Involvement / Feeling	Jewelry, Cosmetics	Feel → Learn → Do (Build an emotional/ego connection)
3. Habitual	Low Involvement / Thinking	Groceries, Detergent	Do → Learn → Feel (Induce trial, e.g., sales, free samples)
4. Satisfaction	Low Involvement / Feeling	Candy, Social Media	Do → Feel → Learn (Focus on pleasure, "life's little pleasures")

C) Moriarty's Domain Model

This model simplifies how an ad message is received. An effective ad must succeed in 3 domains:

1. **Perception:** The ad must be noticed (seen/heard).
2. **Learning:** The ad must be understood (Cognitive).
3. **Persuasion:** The ad must be believed and "felt" (Affective/Emotional).

D) The Facets Model

This is a more complex model stating that an effective ad works on 6 different "facets" or dimensions.

1. **Perception (See/Hear):** The ad is noticed.
 2. **Cognition (Think/Understand):** The ad is processed and understood.
 3. **Emotion (Feel):** The ad creates a feeling or emotional response.
 4. **Association (Connect):** The ad links the brand to positive concepts, people, or lifestyles.
 5. **Persuasion (Believe):** The ad changes an attitude or builds conviction.
 6. **Behavior (Act/Do):** The ad stimulates a response or action.
-

4. Advertising Objectives & Functions

Advertising Objectives: What is the *goal* of the ad?

- To **Inform** (e.g., a new product launch).
- To **Persuade** (e.g., why your brand is better).
- To **Remind** (e.g., "Don't forget to buy...").
- To **Add Value** (by changing perceptions).
- To **Build a Brand Image**.

Functions of Advertisement: What does advertising *do*?

- **Brand Building:** Creates and maintains a brand's identity.
- **Information:** Informs customers about products, features, and prices.

- **Persuasion:** Convinces customers to choose a product.
 - **Reminder:** Keeps the brand top-of-mind.
-

5. Advertising Mediums & Types

Advertising Medium: *Where* you place the ad.

- **Print Media** (Newspapers, Magazines)
- **Broadcast Media** (TV, Radio)
- **Outdoor Media** (Billboards, Banners)
- **Digital Media** (Internet, Social Media)
- **Direct Mail**
- **Cinema**

Types of Advertisement: *What* kind of ad is it? (This is a classic MCQ topic)

- **Brand Advertising:** Focuses on building a long-term brand image (e.g., a "Feel Good" Coke ad).
 - **Retail/Local Advertising:** Focuses on a specific store, location, or sale (e.g., "Sale at Intiaz this weekend!").
 - **Direct-Response Advertising:** Asks for an *immediate action* (e.g., "Call now!" or "Click here to order!").
 - **B2B (Business-to-Business):** One business advertises to another (e.g., Intel advertising to Dell).
 - **Institutional Advertising:** Promotes the *organization* as a whole, not a product (e.g., an ad about UCP's research).
 - **Non-Profit Advertising:** Used by charities, foundations, etc.
 - **Public Service Advertising (PSA):** For a social cause, often run for free (e.g., "Don't text and drive").
-

6. Advertising Process & Phases

These are two simple lists. **Memorize the order.**

Advertising Process (5 Steps):

1. Writing an Ad
2. Getting Approval for the text
3. Estimating the cost
4. Placing Ads and posting announcements

5. Paying for Ads

Advertising Phases (4 Stages):

1. **Briefing Stage:** Defining the problem and objectives.
 2. **Creation Stage:** Developing the ad concept (the "big idea").
 3. **Production Stage:** Filming, recording, or designing the final ad.
 4. **Post Production Stage:** Editing, adding effects, and finalizing the ad for launch.
-
