

1. The Meta Ad Campaign Structure

This is the fundamental hierarchy of how ads are organized. You **must** know what happens at each level.

1. **Campaign Level**
 - **What it is:** The highest level.
 - **What you set here:** The **Ad Objective** (e.g., Awareness, Conversions). This is the *only* thing you set at this level.
 2. **Ad Set Level**
 - **What it is:** Sits inside a Campaign. You can have multiple Ad Sets.
 - **What you set here:**
 - **Audience:** Who you are targeting (demographics, interests, location).
 - **Budget:** How much you want to spend (daily or lifetime).
 - **Schedule:** When the ads will run.
 - **Placements:** *Where* your ads will appear (e.g., Instagram Stories, Facebook Feed).
 3. **Ad Level**
 - **What it is:** Sits inside an Ad Set. This is the "creative."
 - **What you set here:** The actual ad the customer sees.
 - **Format:** Image, Video, Carousel, Collection.
 - **Media:** The visual (photo/video).
 - **Copy:** The text (Primary Text, Headline, Description).
 - **Call to Action (CTA):** The button (e.g., "Shop Now," "Learn More").
-

2. Meta Ad Objectives (The "Why")

Meta groups its objectives into three "funnel" stages.

- **1. Awareness:**
 - **Goal:** Generate interest in your product or service.
 - **Objectives:** Brand Awareness, Reach.
- **2. Consideration:**
 - **Goal:** Get people to think about your business and seek more info.
 - **Objectives:** Traffic, Engagement, App Installs, Video Views, Lead Generation, Messages.

- **3. Conversion:**
 - **Goal:** Encourage people to take a specific, valuable action.
 - **Objectives:** Conversions, Catalog Sales, Store Traffic.
-

3. Meta Ad Placements (The "Where")

This is the list of *locations* where your ad can be shown across Meta's platforms.

- **Facebook:** Feed, Marketplace, Video Feeds, Facebook Right Column, Facebook Stories, Facebook Reels.
 - **Instagram:** Feed, Profile Feed, Instagram Explore, Instagram Stories, Instagram Reels.
 - **Messenger:** Messenger Inbox, Messenger Stories, Sponsored Messages.
 - **Audience Network:** This extends your ads to other *third-party apps and websites* that partner with Meta.
-

✨ 4. Strategies for Innovative & Winning Ads

This section combines the "Innovative Ads" lecture (11-12.pdf) and the "Meta Ad Creative Strategies" PDF by Marcus Burke. These are the "Do's & Don'ts" for making effective creative.

- **Do: Study Your Audience First.** Before you create *anything*, study your audience, see what *native* content (non-ads) they engage with, and understand how they talk.
- **Don't: Start by Defining Your Brand.** The customer doesn't care about your brand; they care about their problem.
- **Do: Mimic Competitors & Native Content.** See what's already working in your niche and start there.
- **Don't: Try to Reinvent the Wheel** on your first try.
- **Do: Test "Big Swings" First.** Test completely different formats (e.g., Video vs. Static Image) and different angles (e.g., "Save Money" vs. "Save Time").
- **Don't: Get Lost Testing Small Iterations** (like a red button vs. a blue button) too early.
- **Do: Diversify Your Creative Mix.** Use a mix of User-Generated Content (UGC), high-production ads, static images, etc.
- **Don't: Put All Your Eggs in One Basket** (like only running UGC).
- **Do: Shoot for Reels (9:16 Vertical Format).** This is the dominant format. Meta can auto-crop it for other placements like 4:5.
- **Don't: Make 1:1 (Square) Your Main Video Format.**
- **Do: Have a Clear Script.** A winning video ad has a **Hook** (first 3 seconds), **Problem**, **Solution** (your product), and **Call to Action (CTA)**.

- **Don't: Make Ads Without a Clear Script** and a strong hook.
-

5. Budget, Bidding & Performance

This is how Meta spends your money and measures success.

The Ad Auction

Your ad doesn't just win by having the highest bid. The formula is:

Total Value = [Advertiser Bid] x [Estimated Action Rates] + [Ad Quality]

- **What this means:** A high-quality, relevant ad (good [Ad Quality]) can *beat* an ad with a higher budget but lower quality.

Budget Allocation Strategy (Testable Rules)

- **Daily Budget Rule:** Set your Daily Budget at **2x your average Cost Per Purchase**.
- **Testing Budget:** Allocate **10-20%** of your *total* marketing budget for testing new creatives and audiences.
- **Campaign Budget Split:**
 - **70-80% for Prospecting** (finding *new* customers).
 - **20-30% for Retargeting** (showing ads to people who *already visited* your site).

Key Metrics to Track (Critical Definitions)

- **CTR (Click-Through Rate):** Clicks ÷ Impressions.
 - *Measures:* How *relevant* or *eye-catching* your **ad creative** is.
- **Conversion Rate (CVR):** Conversions ÷ Clicks.
 - *Measures:* How *effective* your **landing page** is at closing the sale.
- **CPC (Cost Per Click):** Total Spend ÷ Total Clicks.
 - *Measures:* The *efficiency* of your ad in getting clicks.
- **ROAS (Return on Ad Spend):** Revenue from Ads ÷ Total Ad Spend.
 - *Measures:* Your *profitability*. A 2x ROAS means for every \$1 you spent, you made \$2

back.

6. Scaling Your Campaigns

Once you have a winning ad (a "winner"), there are two ways to scale it.

1. Vertical Scaling:

- **What it is:** Gradually increasing the budget on your *existing, winning ad set*.
- **Rule:** Increase the budget by ~20% every few days. (Page 35 says "gradually," Page 36 specifies 20%).

2. Horizontal Scaling:

- **What it is:** Duplicating your winning ad set and changing *one* variable.
 - **Goal:** To test *new audiences* or *new creatives* while keeping the parts that work.
-
