

Information Technology University of the Punjab
SE460T Cloud Computing with Big Data Applications – Fall 2025
Quiz 1 Section B – October 20, 2025

Name: _____

Roll No.: _____

Time allowed: 15 minutes

Maximum Marks: 16

1. Which statements about responsibility are accurate based on the AWS shared responsibility model? (Select TWO.) [2]
 - a. AWS is responsible for the configuration of security groups.
 - b. Customers are responsible for managing their user data.
 - c. AWS is responsible for the physical security of data centers.
 - d. Customers are responsible for the installation, maintenance, and decommissioning of the hardware that they use in the AWS data center.
 - e. AWS is responsible for host-based firewall configurations.
2. Which options are characteristics of the principle of least privilege? (Select TWO.) [2]
 - a. Use encryption.
 - b. Always use groups.
 - c. Craft security policies that limit access to specific tasks.
 - d. Monitor actions and changes.
 - e. Grant access only as needed.
3. Which statements describe AWS Identity and Access Management (IAM) roles? (Select TWO.) [2]
 - a. They provide temporary security credentials.
 - b. They can only be used by accounts that are associated to the person who creates the role.
 - c. Individuals, applications, and services can assume roles.
 - d. They provide permanent security credentials.
 - e. They are uniquely associated to an individual.
4. Which statement about AWS Identity and Access Management (IAM) policies is accurate? [1]
 - a. Identity-based policies can only be attached to a single entity.
 - b. Identity-based policies are attached to a user, group, or role.
 - c. Resource-based policies allow access by default.
 - d. Resource-based policies are attached to a user, group, or role.
5. What's the main purpose of an IAM Group? [1]
 - a. To group AWS accounts
 - b. To organize IAM users and attach policies collectively
 - c. To assume roles across accounts
 - d. To manage temporary credentials
6. Due to a company merger, a data engineer needs to increase their object storage capacity. They are not sure how much storage they will need. They want a highly scalable service that can store unstructured, semistructured, and structured data. Which service would be the most cost effective to accomplish this task? [1]
 - a. AWS Storage Gateway
 - b. Amazon RDS
 - c. Amazon S3
 - d. Amazon Elastic Block Store (Amazon EBS)
7. A company must create a common place to store shared files. Which requirements does Amazon S3 support? (Select TWO.) [2]
 - a. Recover deleted files.
 - b. Compare file contents between files.
 - c. Lock a file so that only one person at a time can edit it.
 - d. Attach comments to files.
 - e. Maintain different versions of files.

8. Which Amazon S3 storage class is designed for backup copies of on-premises data or easily re-creatable data? [1]
- a. S3 Standard-Infrequent Access (S3 Standard-IA)
 - b. S3 Glacier Instant Retrieval
 - c. S3 One Zone-Infrequent Access (S3 One Zone-IA)
 - d. S3 Intelligent-Tiering
9. A company needs to serve static content (images, HTML) from S3 with fast global access and lower latency. Which AWS services/features help achieve this? (Select TWO.) [2]
- a. S3 Transfer Acceleration
 - b. S3 Versioning
 - c. Amazon CloudFront
 - d. S3 Glacier Deep Archive
10. An S3 bucket policy allows s3:GetObject for everyone. However, users still get “Access Denied.” What’s the most likely cause? [1]
- a. S3 bucket encryption is disabled
 - b. Block Public Access is enabled
 - c. Bucket versioning is disabled
 - d. MFA Delete is enabled
11. A company wants to automatically move objects from S3 Standard to S3 Glacier Deep Archive after 180 days. Which feature enables this? [1]
- a. Cross-Region Replication
 - b. Lifecycle Configuration Rules
 - c. Intelligent-Tiering
 - d. Versioning
